

## Sustainnovation Center: Environmental Sustainability Research Center

Sustainnovation Center by Theophane Venard school of Biotechnology and Albert Laurence School of Communication Arts with Research and Academic Services Affairs

Vision of the Sustainnovation Center:

To drive sustainable development by fostering innovation that integrates environmental responsibility, economic viability, and social inclusivity. The Center aims to be a hub for collaborative research, technology development, and knowledge exchange that supports the transition toward a Bio-Circular-Green (BCG) economy and enhances long-term societal well-being and accelerate the achievement of the United Nations Sustainable Development Goals by integrating sustainability and innovation.

The Sustainnovation Center aims to:

- Foster research and development of sustainable technologies: Industry, Innovation, and Infrastructure)
- Promote responsible consumption and production
- Support climate action through eco-friendly innovations
- Enhance inclusive and equitable quality education and lifelong learning on sustainability
- Strengthen partnerships for sustainable development across sectors

## Sustainnovation Center Projects

**Kiff off "Recy-CUP Project"**

Sustainnovation Center

collaboration between Theophane Venard School of Biotechnology and Albert Laurence School of Communication Arts

Let save the world together and reduce carbon footprint in daily lives.

Bring your own cup

Get free Coffee Grounds Scrub Soap

at Uncle Bob coffee, Hua Mak campus

Let see how much carbon footprint can you save..
